Re: File No. A 15-3(660a)
Attention: Mr. J.M. FLUXE

Gentlemen:

This is in reply to your letter of June 8, 1945, requesting clarification of several points concerning the theory of our suggested method for voice transmission over a beam of light.

We have made a number of fundamental experiments, proving to our complete satisfaction, the practicability of our system. As stated in our original letter to you dated March 19, 1945, we have been unable to fabricate a model of this system, due to our inability to secure necessary laboratory and model making equipment. With Navy Dept. sponsorship, we will be able to proceed at once, with the development of this model.

The experiments referred to in the above paragraph, and our analysis, centered about a determination of the modulation index obtainable with an audio power input of approximately 10 watts. As a result of these experiments, we have concluded that it will be possible to secure a modulation index of 2 or greater. Our unique drives, plus the use of the finest possible gratings will insure a substantial frequency deviation from the carrier.

Regarding your observations concerning frequency shifts of light-transmitted signals, we believe noise from this source will be relatively negligible. These shifts, to be significant, would have to be of the order of magnitude of the deviation produced by the audio signals, and with the modulation index contemplated, this does not seem likely to be a serious problem.

A15-3-(3)

In conclusion, we wish to emphasize our sincere desire as citizens and experienced graduate engineers, to devote our energy to the successful completion of this project, which we are sure will give our country a valuable war weapon.

Very truly yours,

Alfred Sarant

Dear Puss,

Your letter was a delight to read so full of happiness and good cheer. I even smiled undeliberately over it. Am glad you are in good shape and that Jimmy is going up so nicely. (Has you received any papers yet from Paul?)

By all means add the finishing touch to Al's mail and tail by presenting him with a chain thus calculated to keep him occupied for the next twenty years. I can recommend no better candidate for such a honor than

P. M. Dirac - "The Principles of Quantum Mechanics" - Oxford University Press - 1935 and

(about 90¢)

Convenient place to get it from is University Book Export Co.

45 East 17th St.

New York 3, N.Y.

(they give about 15% discount)

A smaller but charming volume is

A. Einstein - "The Meaning of Relativity" - Princeton University Press - 1922.

If I can do anything about helping duty let me know. Sounds like a plot by

Caltech.

Spago's in town & looking well.

Regards

Love,
Bill

Dear John,

Letter received with all checks in good order also letter. Well
may you believe when I next see you.

About reaching this summer I am the thought of having a canoe
appeals to me. That would you say, however, to taking a cabin or two
by the shores of some wilderness or other, not convenient for
about expenses into the hinterland? A good deal of expense, say on
some state park or other, can make things right comfortable, particularly
at night. Let me hear from you further in the next instant, as
to who, who, who, etc. I can take a two inch machine, I think,
just when I can get it. That's pretty long for a machine?

Before the usual handman or two. We can make water
pleasantly all around me. They say it will be over that
would be nice.

What do you think of my new history of the world in the
previous paragraph. It is intended to be the understanding
of the world.

Yours & Well

(I am back of the world's history in the world? the place. It is a good one.

My dear
Feb.

I am well and hope you are likewise. The
point and necessity of this letter is the greater. Enclosed is a manual
for purchase of road equipment. Needless to say, Betty and I are deeply
grateful for your ^{interest in the} ~~kind offer~~ matter. Thanks to you and all.

We are studying Grammar for a grammar now. It is called "The
Grammar Grammar" and the English part is very good.

otherwise all is strictly in a rut as to speech.

Thanks again,
Bill

Dear Al,

Thanks for the check. It came in mighty handy, inasmuch as I happened to be in need of some petty cash at the moment. Enclosed is what I hope is an even clad bill-off-sale for my few wicks and wares. Of course, thanks for the use of them, that's why you got them so cheaply. Has you heard from Valade? Hope all quiet here. Enough of this earthly discourse.

I'm taking quantum med. under H.A. Kramers (Dept. of Phil., Chairman of Scientific Committee, the Nat. Acad. E. Comm.). Looks like a wonderful course also some Physics under Rabi, General Physiology under Edg. Weicht (the sense of this is What is Life?), Partial diff. eq. under Kiyon, and a lab physics course in which I'll demonstrate optics apparatus. I shall ^{almost} ~~surely~~ work this term.

Yours by you? Write and tell all. Love to Pico and regards to Mr. & Mrs. Rose.

Your unworthy colleague,
Belt

P.S. I've noticed a magazine article that the first use of a magnifying glass was in 1867.

P.S. Enclosed is a letter. I also had one for Spago. Who shall I send it?
Also was about another (H. C. C.). Also had a letter to you about the school?

Sept. 25, 1945

Dear Pina's All,

Hope you're settled & living in the style that one would
like to be accustomed to. Enclosed are some things that came
for you. Let us hope they are worth the cost of the higher postage
that may be required on this letter. A telephone bill also came which
I plan to take care of as a diversion indication in small part of my
appreciation in being allowed invited to be your guest in your NY
residence. Amen. (I should still guess as regards me).

I heard & saw Betty at the Play & meeting. It's hot stuff all
right.

If & when you write to Gage will you inform him that he
left his pictures (photographs) & sketch book (with the letter Pina's) & mine?
What's cooking up there? Regards to Mrs. Rose

Yours,

B/L
